SQL - UPDATE Query

The SQL UPDATE query is used to modify the WHERE clause with the UPDATE query to update the selected rows, otherwise all the rows would be affected.

Syntax:

UPDATE table_name:

SET column1 = value1, column2 = value2,

WHERE [condition];

SQL DELETE Query

The SQL DELETE query is used to delete existing record from a table.

Use the WHERE clause with DELETE query to delete the selected rows, otherwise all records would be deleted.

Syntax:

DELETE from table_name;
WHERE [condition];

SQL - TOP, LIMIT or ROWNUM clause

The top clause is used to fetch a TOP N number or x percent records from a table.

Syntax:

SELECT TOP number | percent column-name(s)
From table-name
WHERE [condition];
